PURDUE UNIVERSITY CALUMET CENTER, HAMMOND, INDIANA

Wednesday, October 19, 1955

Dr. Lawshe Will Deliver First of Fall Lecture Series

Dr. Charles H. Lawshe, Jr. of the Psychology Department at Purdue will deliver the first lecture of the fall semester at Purdue Calumet Center University.

Dr. Lawshe's subject will be "Psychology in Education and Industry". This lecture will be held in Room 111 at 3:00 p.m., Wednesday, October 19.

Dr. Charles H. Lawshe, Jr. is also Assistant Dean of the Graduate School. He did his undergraduate work at Purdue University and his graduate work at Michigan and Purdue Universities. His chief field of research in recent years has been in industrial psychology. He has done much writing in this field.

Those who are taking psychology now or will be taking it during their college work, are particularly invited. Also, anyone interested in psychology in terms of its use in education, either teaching it as a career or part of other educational work, or in terms of industrial or personnel psychology, should avail himself of the opportunity to hear Dr. Lawshe.

The lecture series is designed to provide special talks, films and other programs. These are directed toward those students interested in such fields as engineering, chemistry, physics, mathematics, literature, history, world affairs, and home economics. While this program is offered primarily for those students in certain fields of work, any student who may be interested in a particular lecture, film, or program should try to attend.

Student Mixer Attracts 180 Students

This fall's social program began its gradual climb on October 1, when a mixer was held in the Student Lounge.

The ceiling was decorated with fall-colored streamers while leaves, pumpkins, and corn stalks ornamented the walls.

About 180 students attended the party, and for the first time in the history of Purdue Center the girls outnumbered the boys. This phenomenon happened because Mrs. Cone invited the student nurses from St. Margaret's Hospital.

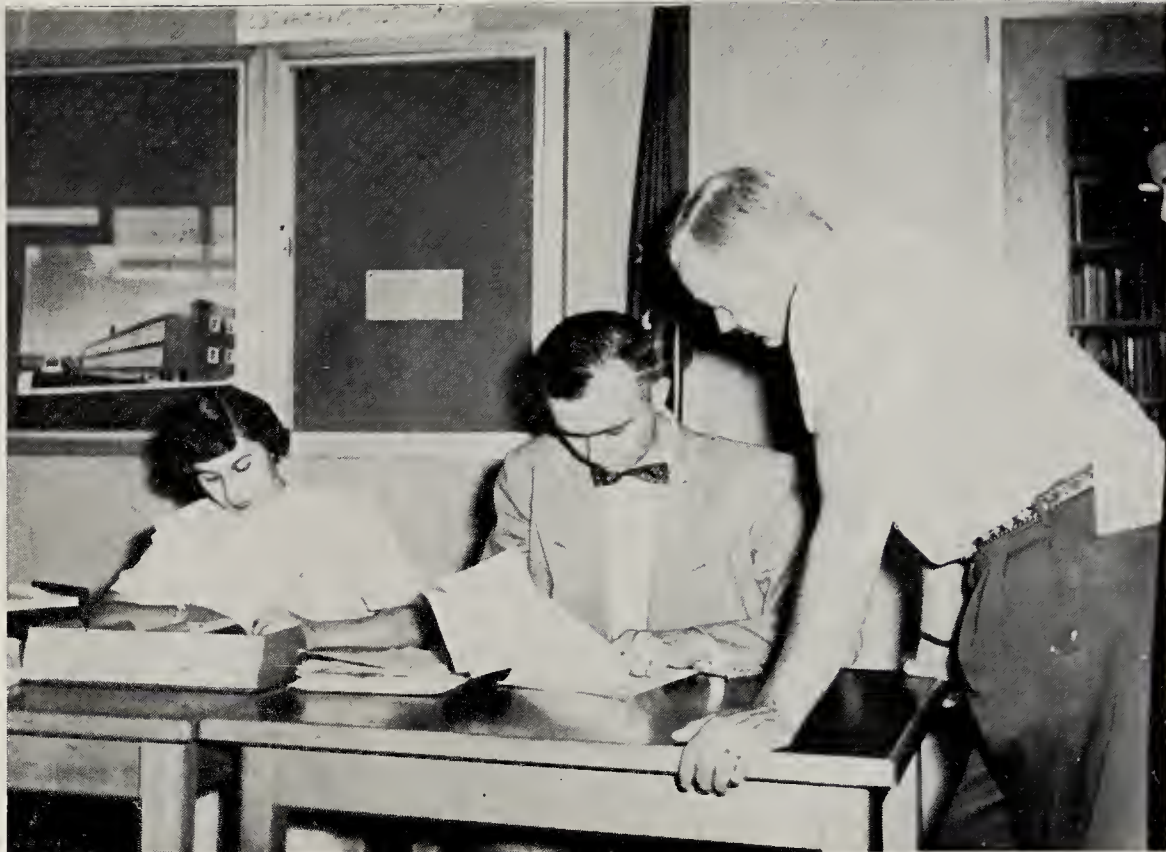

The evening was spent mixing to the tunes of Mrs. Faulkner's records, with occasional adjournments to Room 12 for refreshments. Cookies and punch were served in an atmosphere of candlelight and music.

Jaycees Award Goes To Wm. Mehuron

William O. Mehuron, 1811 Calumet Avenue, was awarded the Hammond Junior Chamber of Commerce Scholarship for the fall semester at the Purdue Calumet Center. Entered in the school of engineering, he plans to take his first two years of college in the Calumet Center.

Mr. Mehuron graduated from George Rogers Clark High School and was awarded the \$50 scholarship because he was a high ranking student in his class.

Dr. Jean Harvey, executive secretary of the University's committee on scholarships, said the scholarship will be renewed for the second semester if Mr. Mehuron has a scholastic average of 2.0 or better for the first semester.

TYPICAL SCENE during registration. Many painstaking hours are spent in counseling and scheduling prior to class sessions.

Purdue Calumet Center Boasts All-High Enrollment of 2325 Students

Final enrollment figures for the fall semester at the Purdue Calumet Center reveals the largest student body since the Center was organized 12 years ago according to Millard E. Gyte, Center Director. Total enrollment reached a new high of 2325 students, an increase of 22.5% over a year ago.

The number of full-time college students increased 28% over a year ago while the number of industrial training programs increased over 20%. The increase in full-time college students is the result of the national population increase in the number of college students plus a new trend for more college students to take their schooling near their home town in an effort to cut expenses by living at home. Gyte quoted the recent article in the September issue of "Business Conditions" published by the Chicago Federal Reserve Bank which says the off campus programs of state universities will solve the crowded conditions found on the main college campus. The local Calumet Center, for example, allows the student to go to college at a drastically lower cost since his room and board at home is a fraction of dormitory fees. Moreover the student has a chance for part-time employment in local industries and in many cases his employment is tied in with his educational program.

This semester the number on the Calumet Center faculty reached an all-time high with 38 full-time staff members and over 60 part-time instructors. The number of courses has been increased and plans for the second semester of the present school year reveal that additional courses and faculty members will be added.

The figure of 2,325 does not include persons enrolled in short workshop courses or in the several one-day seminar programs that have proved so popular at the Calumet Center.

RALPH CARLS ANNOUNCE ARRIVAL OF BABY GIRL

The 'Boilermaker' was recently informed that Mrs. Ralph Carl, the former Jane Chernan, a student at Purdue Center from September 1953 to June 1955, and her husband became the proud parents of a baby girl weighing 8 lbs., 2 oz. on Oct. 2, 1955.

Mother and child are doing well at their Texas home.

Congratulations to the parents.

Purdue Men Win Promotions in Plants

Richard A. Sault received a diploma in June for completing a two-year technical mechanical course at Purdue University Calumet Center.

Mr. Sault took the course on a full-time scholarship sponsored by the Youngstown Sheet and Tube Company, where he was employed during the summer. He is entering Tri-State College at Angola, Indiana, to complete a course in mechanical engineering.

At Inland Steel Company, Cruz Delgado has advanced from shipper assistant, 24" Mill, to conditioning turn foreman, Plant 1 Mills. John Popovich has been promoted to finishing turn foreman, 76" Hot Strip Mill. His former position was No. 1 streine shear helper. These men were students at Purdue Calumet Center in the Inland Steel training program.

Wedding Bell's Potion For Pharmacist Couple

Joseph Stambolija and Celia Kasparek, students of pharmacy last year at the Calumet Center, were married at Holy Angels Church in Gary, Indiana, September 3.

After honeymooning in Wisconsin,

Student Council Seeks Large Turnout For Fall Elections

If your eye has been caught by posters and you have been besieged by persons with petitions, you no doubt know that the fall elections of the Student Council are here.

The Interim Committee of the Student Council announced that elections for office in the Student Council will be held Thursday or Friday, October 20 and 21.

A voting table, ballots, and a ballot box will be set up in the Student Lounge on these days. Students who are not candidates for office will be in attendance under the supervision of the Interim Committee and faculty sponsors.

The student body, as a whole, will elect the secretary and the treasurer of the Student Council. The freshmen and sophomores will elect four representatives each. The part-time students and other students who are interested will elect one candidate.

(Continued on Page Three)

Student Suggestions Are Aid to Success

This article is written for those new students that seem to be in the dark about the activities going on at the center.

At Purdue there are countless activities going on constantly. These activities, such as dances and basketball games, are advertised on the bulletin board on the north wall of the lounge. Also on this bulletin board is placed the general gossip of the school which is believed to be interesting and entertaining to everyone.

Then there is the student council which is composed of students of the Center. It arranges all dances, parties, and assemblies; and is open to all those interested.

If one needs help in any way, these persons will only be too glad to assist him. It is believed that if all will participate in student activities, their stay at Purdue will be much more enjoyed, and they will become better known by their teachers and friends.

sin, they returned to their home at 449 Harrison Street, Gary.

Crossing Guards Are Oriented On Safety Problems

The Civilian Crossing Guards held mass meetings on September 3 and October 1. The purpose of these meetings was to familiarize the guards with the responsibilities and problems of their position.

One of the speakers was Captain John Mahoney, who spoke about the adult crossing guard responsibilities.

Captain Mahoney said that the major responsibility was to protect a child crossing a protected intersection.

Traffic engineers, with the mechanical devices, do everything; or at least they do most everything if a child crosses at an intersection where there is a traffic light.

They are two distinctly different attitudes of the parent toward traffic violators. The first will say that his boy is right. By doing this, the parent is overly protecting his child. In contrast, there is the under-protective parent, who says nothing.

Captain Mahoney said, "In doing the job of protecting and teaching children, we have learned how to teach ourselves to be safe."

"The biggest investment in our city is children. We are improving and growing all the time."

The biggest problem that Captain Mahoney spoke about was the problem of children crossing streets before getting to a protected crossing.

"Remember," said Captain Mahoney, "it's your life - be safe with it!"

Faculty's First Fall Frolic Feasts Funsters

A faculty get-acquainted party was held in the Student Lounge on September 24.

The room was bright and friendly on a rather chilly Saturday night. As the faculty and their wives arrived, they were outfitted with name tags by Mr. and Mrs. Cone, yellow tags for new personnel, black tags for old members.

First item on the evening's program was a short talk by Mr. Thomas Bunsu, of the Purdue Calumet Development Foundation.

Mr. Bunsu outlined the history of the Foundation, described its current work in the area, and pointed out the importance to its projects of active cooperation from region communities.

The Foundation, he explained, is making detailed studies of various area social and economic quandaries, so that, with the help of the information gathered, large neighborhoods may undertake to solve some of their more pressing problems.

After the talk, the faculty played an ingenious, bingo-like game designed to make the names of new as well as of old members familiar to everybody. Conversations sprang up, witticisms flew.

After Mr. and Mrs. Zacher had distributed prizes to the winners, coffee and large helpings of ice cream and cake were served round.

The evening ended with general good humor, hurried gulps of more coffee, and prospects of a very pleasant year at the Center.

Congratulations to the members of the part-time T. I. faculty who in the first issue were slighted regarding their appointments. Congratulations, also, to Mrs. Schmidt and Mrs. Meier on their appointments to new posts as managers of the bookstore and the library, respectively.

The Community Chest Needs Your Help

Be ready to give your share to the Community Chest this week. Students and faculty will have a chance to make contribution to the Community Chest at the school. Everyone is urged to do his very best to make the 1955-56 Chest Drive the success that it should be.

Educational Observations

(Times Editorial)

In a recent editorial, **The Hammond Times** reported the following educational observations:

1. Only about 25 per cent of our high school students now study algebra.
2. Only about 12 per cent of our high school students study geometry.
3. There are many small and even some large high schools in which students' lack of interest in physics and chemistry has caused these basic scientific courses to be discontinued.

The **Times** offers as possible reasons for this lack of interest two surmises. Perhaps students feel that the sciences are being used almost exclusively as tools for destructive wars. Or perhaps they feel that all the "big" work in the sciences has already been done and that nothing is left to do in the wake of the numerous, amazing nuclear discoveries.

Whatever the real reasons — the answers to both the foregoing arguments are obvious — more and more young men find to their great disappointment that their lack of preparation in mathematics prevents them from taking many desirable college science courses. The **Times** would place at least part of the blame with parents and counsellors. If these people, the editorial concludes, would be more alert to give the kind of guidance the high school student so obviously needs, he would undoubtedly realize the importance to any science course of a basic preparation in mathematics.

Library Tips Offered Students, Rules Are Listed Here

To add perspective to one's studies, it is a good idea to use the reference books in the library.

The books are shelved according to the Dewey Decimal system. They start at the left of the north door, numbering from the lowest figures of the Dewey System and continue around the room through the 900's.

There is a bookcase of reference books which are not to be taken from the library. This case is on the east side. Immediately next to this case is a Chemistry group donated to the library by Dr. Eugene Lieber. These books are also to be used only in the library.

At the back of the library one can find magazines such as *Life*, and *Saturday Evening Post* for general reading. In addition, there are a number of magazines pertaining to definite studies and fields. Many important engineering journals are included.

Students are not to go behind the librarian's desk except for the books loaned to our library by the Hammond Public Library. One may ask the librarian for any material he needs which may be found behind the desk.

Most of the books may be checked out for 14 days and may be renewed if the book is not in demand. There is a fine of one cent a day for overdue books.

All students are to feel free to go into the library at any time to study. It is, of course, necessary that the library be quiet to allow efficient studying. The librarian is there to check out books and to aid any student who needs help in finding material.

With the new plan, which is in effect now, Mrs. Paul Meier is in charge full time. From now on, the library will be more usable for study than it has been.

Loose Rivets In the Boiler

By John Millard

As you know, if you have read the rest of this paper, the Student Council elections are being held very soon. There are a number of worthy candidates for all offices, and it is not the policy of this column to support any candidate in particular. Rather, we wish to support the whole group, and more important, the elections and the student government. The Student Council is the governing body at Purdue University Calumet Center. It consists of teachers, the Assembly (3 Freshmen, 3 Sophomores, and 3 T. I. representatives) and the Executive Board (3 representatives-at-large and the 4 officers).

You elect the Council, it is your group!

The chief duty of the Council is to supervise the activities here at the Calumet Center. It sponsors dances, hayrides, picnics, and a yearly Christmas assembly. The Council also has charge of the lounge and the supervision of parking. As you can see, the Council fills a definite need here at the Center.

Last year, we had a very unfortunate blot on the record of student activities. Out of over 1,500 students in both college credit and Technical Institute, only 125 students took the trouble to vote in the elections. This year, of course, this situation will not be repeated. This year there is some real stiff competition in the races for the various Council positions. There are a lot of fine candidates for all offices, and it will be up to the student body to choose the people they want to represent them on their Student Council!

The new basketball schedule is in, and it looks like a series of really exciting games, even better than last year's. Judging by the rate at which activities are being supported by the student body, it seems that a pep club of some kind will have to be organized. The question is who is going to start it. To whoever that person is, or even better, those people are - the need is now, not in two months. Try to be fairly organized by the first game.

If this column can be put to the use of anybody who wants to organize such a group, please let us know, and we'll do our best.

More money is needed for the Mark P. Anderson Memorial Loan Fund. Let's all get together and see if we can get donations from local businesses. See Pat Moscatello, the new secretary for more details!

That's all for this month, so long!

Definition: (From Psychology?) Independent Variable—A Woman.

The battle of the sexes went one step further, here at the center, earlier this month. It seems Dr. and Mrs. Cone each had a class scheduled at 3:00 in room 7.

All students for both classes met in room 7.

Before the battle, neither side had any statements for the press. Both entered room 7, but when faced with an out-and-out battle, Dr. Cone proved once again, that discretion is the better part of valor and withdrew his class to room 14.

The social dancing class being offered this year is going to look a little one-sided unless a few more of you girls sign up. Believe me, it is 15 times the 16 dollar fee worth of good fun!

Teachers Learn About Developmental Reading At Summer Session

Purdue Personalities . . .

For three weeks from July 5 to 22, twenty-two teachers from high schools and grade schools in Northern Indiana attended all-day class sessions of English 687, Developmental Reading for Teachers, taught by Dr. George B. Schick, who came up from Lafayette campus to give the course. Dr. Schick was assisted by Dr. John S. Tuckey, of the Calumet Center Developmental Reading programs in their own schools.

During the first hour of each day's session, the teachers were themselves students in a regular Developmental Reading class conducted by Dr. Tuckey; in the following hour they observed and worked with a special group of high school students from the Hammond area, who volunteered to come in one hour each day to take a short course in Developmental Reading on a tuition-free basis. The remainder of each day was devoted to lectures on reading problems by Dr. Schick, reports by class members, and special conferences concerning the establishment of reading programs in particular schools.

The teachers attending were Doris Aykens, Brookwood School, Glenwood, Ill.; Cora Belle Beare, Memorial Jr. H. S., Lansing, Ill.; Elizabeth J. Benson, Irving School, Hammond; Anita Bowser, Purdue-Barker Center and Michigan City H. S.; Rev. Fr. Robert E. Burns, Mendel Catholic H. S., Chicago; Mary E. Cauffman, Chesterton H. S.; Leitha Pauls, Bloom Twp. H. S.

Else R. Datisman, Franklin Elementary, Griffith; LaVerne M. Harader, South Side H. S., Ft. Wayne; Leona M. Ingel, China Lake, California; Joan E. Janda, Hobart Jr. H. S.; Alice Kingery, Calumet Twp. H. S.; Kenneth R. Lux, Mendel Catholic H. S.; Patricia McCarty, Hammond H. S.; Catherine A. McDade, Gary; James C. McMahon, Thornton Twp. H. S., Harvey, Ill.; Lewis L. Mears, East Chicago Public Schools; Edna H. North, Bloom Twp. H. S.; Chicago Heights, Ill.; Leitha Paulsen, Bloom Twp. H. S.; Viola B. Phillips, Walnut Grove School, Arcadia, Ind.; Richard Scheub, Wirt H. S., Gary; Ethel Weaver, Lester Crawl School, Lansing, Ill., and Edith Young, Highland, Indiana.

Student Council . .

(Continued from Page One)
The ballots for freshmen will contain only the names of the freshmen representatives, the secretary, and the treasurer. The sophomore ballots will contain only the names of the sophomore representatives, the secretary, and the treasurer. The same will hold true for the Technical Institute and part-time students.

The president and vice-president will be elected by the Representative Assembly after the elections for the representatives, the secretary, and the treasurer have been held.

If enough interest for a political rally is evidenced by the student group, the Interim Committee will hold a rally in room 111 at 12:15 on Wednesday, Oct. 19. This will give the candidates opportunity to present themselves and to give the platform on which they are running for office.

The following is a list of the candidates:

For President—G. Mathis, R. Rucoba and R. Napiwocki.

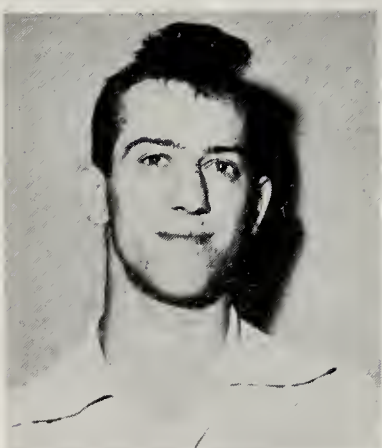

For Secretary: Judy Shields.

For Treasurer: Carolyn Barnard. Candidate for Freshman Representative: V. Ortega, M. Kenes, B. Shelton, B. Wontorek, Charlene Chasteler and D. LaFontaine.

Sophomore representative candidates are: D. Dunkelbarger, W. Pehlen, A. A. Isaac, E. W. Wright, E. Gyte, D. Griesel and C. Isaacson.

Technical Institute candidates include: J. Bukovich, "Hondo" Poklemba and M. O'Melia.

Part-time representative: R. Williams.

Ray Napiwocki

You may have seen this friendly fellow walking up and down the halls of Purdue Extension. He is Ray Napiwocki and is candidate for president of Student Council. Ray has had previous experience in the council as representative from Technical Institute. He also served on several activity planning committees last year.

Ray was born in East Chicago where he attended St. John Cantius grade school and, later, Bishop Noll and EC Washington High Schools. He is now studying Metallurgy in the Technical Institute here. Next year he hopes to attend Tri-State College in Angola, Indiana, to continue his Metallurgical Engineering training. In the near future he hopes to remain at the Inland Steel Research Center here to work as a research metallurgist.

When he isn't studying or working, which isn't very often, he enjoys swimming, fishing, and hunting. He also has several collections which interest him.

ROBERT RUCOBA

Many of us were first introduced to Bob Rucoba through the dance posters which he so ably draws. This year he is running for vice-president of the student council.

Bob was born in San Antonio,

Bob Rucoba

Texas, but went to school in East Chicago. After high school Bob joined the army, which took him to Germany, about which he has many interesting experiences to relate.

When Bob received his release from the army, he began his training in the Metallurgical Engineering field. Next year he plans to continue study at the Purdue Campus.

Bob's secret ambition is to be a commercial artist, as was proved by the posters he drew for activities last year. His favorite sport for participation is Jai-Ali.

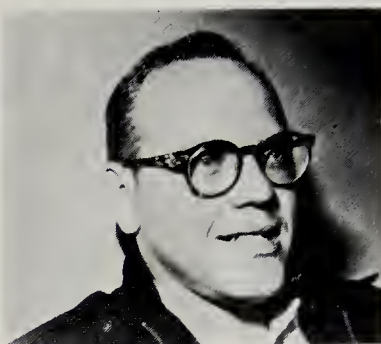

GLENN MATHIS

One of the most active and most interested members the Student Council had last year, was Glenn Mathis. This year he plans to be even more active, as he is running for the office of president of the Council.

Glenn was born in Gary and later attended Lew Wallace High School there. In high school he was active in sports such as swimming, track, and cross country.

Between the time he graduated and the time he joined the navy he acquired a charming wife.

When he finished his naval training, he began his college career. Glenn is studying to be an aeronau-

Glenn Mathis

tical engineer. Next year, he hopes, will find him on campus.

In the future he would like to do some traveling; he is an outer-space enthusiast.

QUIET!!!

It has been noticed lately that a lot of outside activities have been making use of the facilities here at P.U.C.C. The students are very happy to have them, but there is a small request — Could the noise from certain groups be cut down? There was no objection to the firing of pistol cartridges by the crossing guards because here was no sustained noise, but at 1:00 p.m. on a certain Tuesday of this month there was such a racket (much like a group of undisciplined high school students yelling before an assembly) that it was difficult for some persons in the rear rows of classes to hear the instructors. This situation was followed by some person using a public address system, a situation which did not help matters in the least.

"Life is too short to be little," "Disraeli once said. We permit ourselves to be upset by the little incidents not worth the time and energy we give them. What if someone is ungrateful, or another has spoken unfairly of us; what if we have not received an expected reward? Shall we let such happenings spoil our day, or any part of it?"

ATTENTION T. I. MEN!

All members of the Technical Institute who expect to graduate during the current year or next spring are asked to stop at the Administrative Office for mimeo application forms within the next two weeks.

Coach Looks For Good Season Here For Round Ball

Brown grabs the rebound and fires the ball out to Jones. Jones passes to Smith, who quickly dribbles down the court. It's a two-on-one! Smith fakes, then passes back to Jones, who drives in and dunks a two pointer. Another basket and another victory for the Calumet Boilermakers!

In only four lab periods, or approximately one month, the Calumet basketball team will launch the 1955-56 basketball season. This year, as in the past seasons, the squad will be directed by Coach Bob Hayes.

According to the opinion of our coach, the basketball prospects look very good. There are several graduates from local high schools and also a few transfers who show talent with the properties of the roundball. If history has anything to do with basketball (besides making the players ineligible), we are set for a fruitful season.

In the past, the Calumet Center team has won the tournament among the Purdue Extension Schools every other year. According to the stars, this is our year to win. Let's hope so!

At the present time 16 games have been scheduled for the 1955-56 basketball season. Although only seven of these are at home, all but two of the games played away are within easy driving distance.

There is one phase of our history (athletic history, that is) that we do want to alter. Last year, the student attendance varied from nil to 10—not a record to be proud of. This year, let's all go out to show the team that we do have pride in our school by rooting them to victory.

At a later date a completed schedule will appear on the bulletin board. Later on, additional information concerning busses and car pools for transportation to the games will be posted.

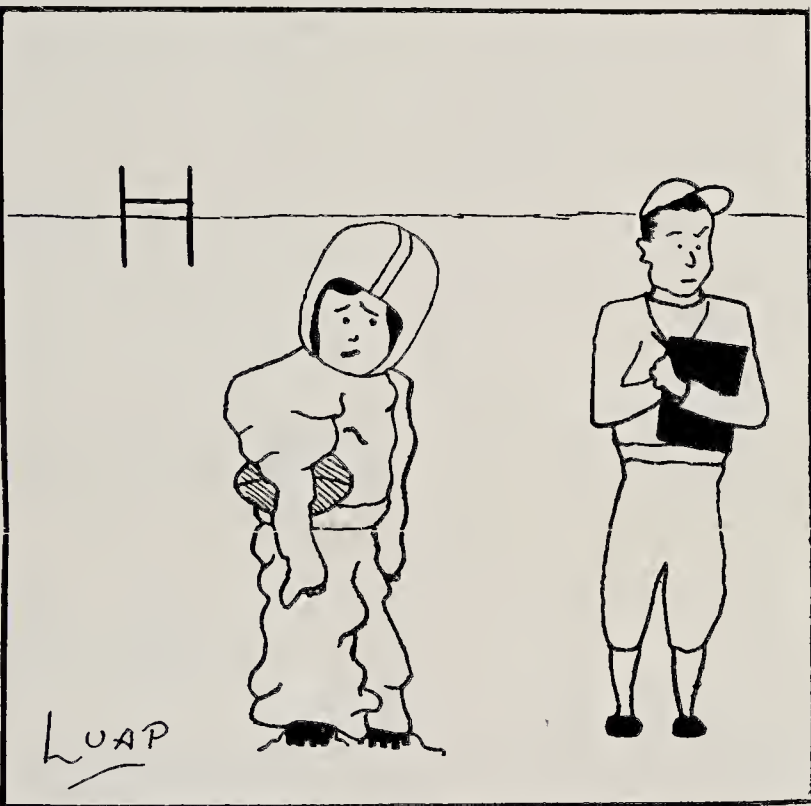

The Calumet Boilermaker staff would like to take this opportunity to wish Coach Bob Hayes and the basketball team the best of luck in the 1955-56 basketball season—may this season be your best.

Tech Institute Meet Held at Lafayette

More than 50 members of the Purdue University faculty from the off-campus centers at Hammond, Indianapolis, Fort Wayne, and Michigan City attended the semi-annual staff meeting of the Technical Institute at Lafayette Thursday and Friday, September 8 and 9.

The Calumet Center was represented by Prof. Millard E. Gyte, director; Prof. Paul T. Meier, assistant director; and R. L. Anderson, L. M. Aurelius, R. J. Combs, P. V. Flannery, F. D. Hays, Mary R. Maginsky, G. L. Rainey, J. C. Rapalski, N. C. Relich, C. F. Rhodes, F. F. Schlosser, M. D. Schmid, Warren Seibert, William Kir-Stimon, H. A. Williamson, and C. H. Zacher.

Dean C. W. Beese, of the Technical Extension Division, and Prof. Von Roy Daugherty, head of the Technical Institute, were in charge of the meeting. Talks were given by Dr. George A. Hawkins, dean of the Schools of Engineering, and L. J. Freehafer, business manager of the University.

Subject matter committees held work sessions during the two-day meeting on curriculum planning and the program for the coming school year. Mr. Anderson, Mr. Hays, Mr. Relich, and Mr. Schlosser, of the Calumet staff, were among the committee chairmen.

Purdue's Technical Institute was established in 1943 and now has an enrollment of more than 2,000 students. The program offers two years of specialized study leading to the diploma of Associate Technical Institute include building construction, industrial, electrical,

technologies. The Institute also offers several special services, including a practical nursing program at the Calumet Center.
